

REMARKS

The above amendments are submitted in order to enter the sequence listing into the Application and to reduce multiple dependencies and to conform the claims more closely to U.S. practice.

Entry of the foregoing amendments and early and favorable processing in the National Phase before the United States Patent and Trademark Office is courteously solicited.

Respectfully submitted,

DAVID A. JACKSON
Attorney for Applicant(s)

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

Claims 1-8 have been amended as follows:

1. (Amended) A method [Use of a histacalin protein (as defined above) in the manufacture of a medicament] for the treatment or prevention of allergic rhinitis, said method comprising administering to a patient in need thereof, a medicament comprising therapeutically affective amount of a histacalin protein.
2. (Amended) A method [Use] according to claim 1, wherein said histacalin protein is derived from a blood feeding ectoparasite.
3. (Amended) A method [Use] according to claim 2, wherein said histacalin protein is derived from a tick.
4. (Amended) A method [Use] according to claim 1, wherein said histacalin protein is the MS-HBP1, FS-HBP1, FS-HBP2 or D.RET6 protein, a functional equivalent thereof or an active fragment thereof.
5. (Amended) A method [Use] according to [any one of] claim[s] 1 [to 4] wherein a pharmaceutically-acceptable excipient is also used in the manufacture of the medicament.
6. (Amended) A method [Use] according to [any one of] claim[s] 1[to 5], wherein one or more antihistamine agents or anti-sedative agents is also used in the manufacture of the medicament.
